Ministry of JUSTICE × VERSION 1

# Transformation on your terms: what Version 1 can do for the Ministry of Justice

Modernisation means change – and change can be challenging. At Version 1, though, we've been helping your agencies deliver on your transformation ambitions for more than a decade already.

We understand how the department and its technology works. We know how to operate in your complex judicial and regulatory world. And more than that, we care about your mission. Now, we want to build on our joint achievements, helping you deliver a world class justice system that's fit for the future.

## Deep judicial and regulatory experience

**50%**

reduction in Oracle costs for HM Courts & Tribunals Service

**78%**

reduction in case management administration for Cafcass

**20%**

reduction in annual Azure costs for HM Prison and Probation Service

## We understand your priorities

### De-risking change

By delivering on time, optimising your IT budgets, and doing more for less.

### Continuing the modernisation journey

By tackling the legacy of ageing infrastructure, and becoming increasingly user-led.

### Embracing new approaches

By harnessing the power of new technologies to speed up delivery of the MoJ's mission.

> **"We have found in Version 1 a partner who really cares about our organisation, displaying empathy to our needs and priorities"**

**Robert Langley**, CIO, Cafcass

## Where do we come in? By helping you to...

### Reduce the risk of change

For 12+ years already, we've been helping your tech teams with the standardisation, best practices, and agile ways of working they need to reduce the risk of change.

### Modernise – your way

From data centre exits to cloud optimisation, wherever your projects take you, our award-winning teams are here to advise and support.

### Innovate and adapt

Services evolve, priorities change, and tech moves on. But with our deep knowledge of the Ministry's systems and culture, we can help keep your

## Introducing AI Labs

> **“Our mission is to facilitate our client’s adoption of AI-related technologies to reimagine business success and drive customer satisfaction.”**

Established in 2022, AI Labs has a deliberately narrow focus to help the MoJ develop real-world solutions on Generative, AI, Conversational, AI, Computer Vision, and Sustainable AI–including ethics and explainability.
