citi × VERSION 1

Quality execution, global delivery

Retiring legacy, modernising apps, migrating workloads and managing data —transformation never stops at Citi. As a trusted partner for Citi's Markets Technology teams, we've completed multiple projects, grown to offer a full-stack capability, and developed domain expertise worldwide.

Citi customer success to date

120+

projects successfully delivered

70+

engineers at Citi

11

Delivering value for 11 years

We're here to support Citi's top priorities

Accelerate execution

Drive workforce transformation, upskill your engineers and deliver modernisation.

Extend your reach

De-risk your operations and expand Citi's capabilities in EMEA and North America.

Innovate around experience

Innovate apps and platforms to connect your teams, work smarter and enhance client experiences.

> **"Version 1 remain integral to the strategic development and deployment of the Blackbird programme. Serving as a steadfast, long-standing collaborator, they offer crucial technical expertise. Their contribution has proven indispensable to the success of the application"**

Marc Johnston,
eTrading Co-Head & Sales

Aligning to your priorities

Accelerate modernisation

Our hybrid resource model delivers exactly the right mix of skills, domain and software expertise. Exactly when and when you need it.

Scale up delivery, at speed

Version 1 has scaled up its business to support yours. Now we can do more from more locations, deploying the right resources to support project delivery.

Stay on the front foot

Our tech consultants can help you make sense of, and apply, the latest technology - from GPT enhanced code conversion to new tools and resources.

Our financial sector experience

Introducing AI Labs

“Our mission is to facilitate our client's adoption of AI-related technologies to reimagine business success and drive customer satisfaction.”

Established in 2022, AI Labs has a deliberately narrow focus to help Citi develop real-world solutions on Generative, AI, Conversational, AI, Computer Vision, and Sustainable AI—including ethics and explainability.

Supporting leadership and driving innovation at Citi
