

VERSION 1

Approval Express Benefits vs
JD Edwards Mobile Approval App

22 January 2018

Approval Express Benefits vs JDE Mobile Approval App

	Approval Express	JDE Mobile PO Approval
Remote Approval	Allows approval via e-mail with no requirement to log in to JDE	Functionality supported only if able to sign in and connect to the JDE system
Software Install	Fully clientless with no requirement to load additional software on the PC or mobile device, just need e-mail access	Mobile app install is required onto the mobile device
Hardware Install	Middle Tier server required – equivalent to desktop PC size	JDE Mobile requires ADF runtime
Multi Functional	Supports PO Approvals, Budget Approvals, AP Invoice Approvals, Expense Approvals and Leave Approvals – all via e-mail	Where available from JDE these are all individual apps that must be downloaded and monitored
Attachments	All media object attachments will be attached to the approval e-mail	Only the first text attachment is displayed in the Notes field of the mobile applications

Approval Express Benefits vs JDE Mobile Approval App

	Approval Express	JDE Mobile PO Approval
Budget Approvals	Supports budgetary approval as per standard JDE functionality	Does not support budget checking or budget approval features
Line Level Approval	Supports order-level and line-level approval	Supports only order-level approvals
Document Types	No limit on document types supported	Allows up to ten document types only
Grouped E-mails	Groups multiple order approvals into one e-mail	Sends individual request for each individual order
Extensibility	Soft coding approach allows for customisation of information delivered and process logic if required	Modification to standard applications would be required using MAF
