

# VERSION 1

## AWS Control: Billing Service Optimisation

### Key Features

- › **Optimised** AWS billing service removes complexity
- › **Service levels** to match your requirements
- › **Savings** advice helps lower your AWS bill
- › **Access** to our cloud infrastructure experts

### Benefits

- › Control your AWS bill
- › **Optimised** architecture guidance
- › **Evidence** of consumption
- › **Predictable** cost planning

One of the major factors driving companies to migrate to the Cloud is the minimal upfront cost of resource provisioning and an easy, pay-as-you-go operating model. These two factors, along with the disposable nature of the wide variety of available computing resources, and the ease of resizing those resources, makes Cloud an attractive alternative to large data centres.

However, balancing the demands of the business in terms of innovation and performance while delivering cost optimisation can be challenging. Organisations making a transition to the cloud or who have completed a transition will demand optimised costs but are unlikely to achieve this without an investment in operational excellence.

### Cloud Economics: Controlled

Version 1 can help you understand your monthly AWS bill and advise on how to best optimise your cloud costs. Specific actions we advise customers to undertake include:

- › Identifying and suspending ghost and unattached storage instances
- › Right-sizing AWS consumption elements to reduce costs to an optimal level without impacting performance
- › Identifying, suspending or terminating unused compute instances
- › Uncovering opportunities to use reserved instances in order to drive cost savings from up-front investment

Constant tuning, management and automation of cloud assets is essential to achieve efficiency and cost optimisation.

The 2018 Rightscale Cloud report stated that managing cloud spend is a challenge for 76% of respondents

# AWS Control: Billing Service Optimisation

AWS Control Billing Optimisation service from Version 1 gives customers access to best-practice Cloud optimisation guides and an opportunity to discuss and evaluate your cloud estate with our Cloud Optimisation experts. With Standard, Premium and Enterprise packages we have the right service to meet your individual needs.

	Standard	Premium	Enterprise
Monthly Billing Reports	✓	✓	✓
Access Cloud Experts	✓	✓	✓
Savings Reporting	✓	✓	✓
Savings Recommendation	bi-annually	quarterly	monthly
Proactive Cost Optimisation			✓

Version 1 delivered savings of \$346,000 in the first year of a cloud partnership with a major international airline.

## Why Choose Version 1 as your AWS Partner?

Version 1 is a leader in Enterprise Cloud services and was one of the first AWS Consulting Partners in Europe. We specialise in migrating, running and optimising complex enterprise workloads in Public Cloud. We are trusted by global brands to deliver IT services and solutions which drive customer success. Our 1200 strong team works closely with AWS to help our customers navigate the rapidly changing world of IT.
