

COMMUNITY FIRST

An Industrial Visit to Version 1

A visit from Udhyam Learning Foundation

Udhyam Learning Foundation brought over 40 young adults from their partner NGO as part of Industrial Visit. The visitors came from a shelter home, and have shown great interest in visiting a corporate office to understand the process/functioning of an organization.

During this morning session, the Version 1 management team introduced the organisation to the visitors, and gave them insights and career guidance advice in the Operations, IT & Finance fields. The Version 1 team then took the visitors for a tour of the offices, to give them a real world insight into how an IT company looks and works.

The team then had refreshments and lunch with the young adults, with student examination pads also given out. Overall, the day was a great success for the young adults, with each visitor developing a solid understanding of how Version 1's Bangalore office operates.

Objectives

- › Helping young adults understand business functions.
- › Insights and Career Guidance into Operation, IT and Finance.

Highlights

- › Over 40 young adults visited from NGO.
