VERSION 1

APPLICATION MODERNISATION

Modernise Your Existing Applications for Greater Innovation and Agility

Version 1 helps customers across the UK and Ireland derive optimal value from existing systems. We are in a rapidly changing Digital era, and businesses face increasing pressure to change the way they operate. We don't believe you should let the investment you have already made go to waste – we can help you to modernise your core business systems and legacy applications to work in the way you need them to.

A Unique Methodology for Modernising Applications

Our unique methodology for modernising applications is highly beneficial to enterprise organisations seeking an agile, strategic and outcome-focused approach to Application Modernisation.

"We chose Version 1 as our Cloud transformation partner as we have a long history of working together. For over ten years, Version 1 has been managing and running the databases which are core to our infrastructure and our platform, and they also support our BI solution. There was no decision to make, we were going to work with Version 1 on our Cloud transformation journey. *Eoin Greene, CurrencyFairCapital*

Version 1 supports Digital Transformation in 4 key areas:

Enable
- Cloud Adoption Framework
- Cloud Economics

Migrate
- Oracle workloads
- Microsoft workloads
- AWS Outposts

Transform
- Application Modernisation
- Innovation as a Service

Optimise
- Next Gen MSP
- Cost Optimisation
- Well Architected Review

Enable

Digital Transformation

Transform

Migrate

Next Gen Managed Service

aws partner network

> " We are continuously upgrading and maintaining our system and Version 1 is central to this. For example, in the past few weeks we have added new VPN tunnels to AWS, worked on DNS changes in AWS and set up a new Jenkins test environment. We have found the Version 1 Infrastructure team very knowledgeable and professional in our dealings with them. I would have no hesitation in recommending Version 1.
