

VERSION 1

CLOUD ECONOMICS ASSESSMENT

A rapid comparative monetary analysis between existing on-premise workloads and Azure including readiness levels and migration pathways.

As many organisations embrace Cloud computing, acquiring Microsoft online services is becoming the new norm. Accurately assessing Azure requirements can be complex, time consuming and result in challenges such as:

- Failure to identify right sizing opportunities
- Poorly optimised procurement
- Understanding the financial and operational impact of a migration
- How to build a business case for Azure

Using a blend of data driven tooling, technical and software asset management expertise this foundation assessment supports organisations during the pre-planning stages of datacentre modernisation planning. The high level steps are:

Discover Weeks 1 – 2

- Initiation workshop designed to catalogue:
 - Business Goals
 - Technical requirements
 - Constraints
 - Post migration costs & considerations
- Automated collection of asset intelligence

Analyse & Verify Weeks 3 – 4

- Analyse data and categorise workloads by:
 - Type
 - Future State
- Compile insights to enable rough order of magnitude estimate for migration & supplementary Azure costs
- Draft findings validation workshop

Present & Recommend Week 5

- Presentation of findings
 - Readiness levels
 - Azure related cost estimates
 - Optimisation opportunities
 - Additional considerations & dependencies
- High level migration plan including recommended next steps

Assessment Deliverables

- Server inventory, utilisation & readiness levels
- Identification of target Azure candidates
- Azure cost projections
- Guidance on dependencies & other pre-requisites
- Outline of phased migration approach

Benefits

**Streamline
licensing**

**Control
Cloud Costs**

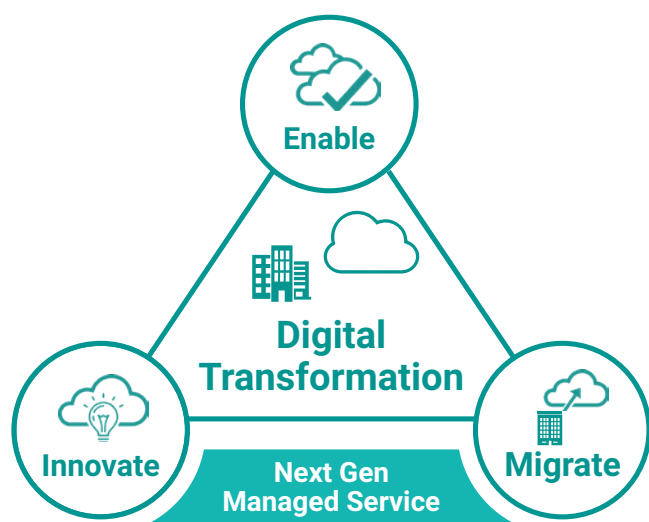

**Enable Workload
Prioritisation**

**Gain Strategic
Insights**

Version 1 supports Digital Transformation in 4 key areas:

Enable

- Cloud Adoption Frameworks
- Architecture & Migration Accelerators
- Cloud Economics

Migrate

- Migration Factory
- Oracle on Azure
- Migration-as-a-Service

Innovate

- Application Modernisation
- Digital Transformation & AI
- Big Data, Insights & Analytics

Next Gen Managed Service

- Azure Cost Optimisation
- Azure DevOps
- Service Reliability Engineering

Gold Application Development
Gold Application Integration
Gold Cloud Platform
Gold Cloud Productivity
Gold Collaboration and Content

Azure FastTrack Enabled

Microsoft Azure Marketplace

2019 Microsoft Intelligent Cloud Award Winner

Global Data Estate Modernisation Partner of the Year Finalist

Your Microsoft Ready Partner

Version 1 helps customers across the UK and Ireland derive optimal value from existing systems. We are in a rapidly changing Digital era, and businesses face increasing pressure to change the way they operate. We don't believe you should let the investment you have already made go to waste – we can help you to modernise your core business systems and legacy applications, utilising emerging innovative Microsoft technologies, to work in the way you need them to.

1,300+ Strong Team

20+ Years Expertise

115+ Million Revenue

98% Customer Retention
