

Mobile Purchase
Order Approvals for
Seajacks

VERSION 1

When the Renewable and Hydrocarbon services company wanted a remote Purchase order approval solution, they turned to Version 1.

Challenges

A remote Purchase Order approval solution was needed for JD Edwards that allowed globally dispersed approvers to receive and respond to approvals without having to log in to JD Edwards.

Solution

Approval Express was implemented to process standard JD Edwards Purchase Order approval workflow messages. The new solution sits alongside standard JD Edwards with no modification to standard code.

Benefits

Approvals are possible using secure and auditable e-mail process. They are accessible by approvers wherever they are, using an easily adopted and intuitive to use process. No additional hardware required and no additional software or mobile application to install on user devices.

“ *It is a practical and user-friendly control function which has allowed us to utilise JD Edwards in a much more efficient way. A clear improvement for Seajacks so far.*

- **Aaron Beck**, Management Accountant, Seajacks UK Limited
