

VERSION 1

Version 1 Shadow Board 2020

January 2020

Orlaith Kelly
D&C Solutions, Ireland
Business Analyst, DAERA

My name is Orlaith Kelly and I joined Version 1 Belfast in June 2019. Since then I have been working as part of an agile scrum team as a Business Analyst within the DAERA account. I come from a consulting background and have worked across a variety of clients, industries and countries. I'm looking forward to learning more about Version1 and meeting everyone selected for this opportunity.

Joey Phan
Business Support
Content Marketing Associate

I joined Version 1, Edinburgh after graduating in Business with Marketing Management in July 2019. During my degree, I undertook a 1 year marketing placement at Newcastle Int Airport and a 3 month marketing internship at The Escape Key, a live escape experience provider. I'm currently part of the marketing team, creating inbound content across Cloud, Digital, ERP, Innovation & Customer Success to drive brand awareness & lead generation. Since joining I have worked on a variety of initiatives, from launching Version 1's Medium blog, helping with customer facing events such as our Oracle Applications Day, developing the #StartsWithaName campaign content and creating graphic design for our digital and social channels.

Eoin Maher
ERP
ERP Consultant

I began my career with Version 1 in September 2016 after graduating with a degree in Business Information Systems from NUI Galway. As a graduate, I joined the ERP Managed Services team in Dublin and worked there for 1 year before taking a Career Break for 15 months to go on a Graduate Visa to Austin, Texas. In January 2019 I returned to Version 1 and re-joined the ERP Managed Services team but over the course of the year have also gained experience working on ERP Projects such as the Clifford Chance Project and also had the opportunity to work with the Innovation Team. I am eager and excited about the year ahead with the 2020 Shadow Board.

Aoife O'Sullivan
D&C Solutions, UK
UX Consultant, Cafcass

I am currently working as a UX consultant on the Cafcass project, based in Fleet House in London. At university, I studied psychology at undergraduate level before completing a Masters in Advertising. I undertook a conversion course in computer science from 2017-2018 before joining Version 1 in January 2019. Prior to my role in the UK, I was based in Strand House in Dublin and working as part of the Department of Transport team in a technical support and Java development role.

Dana Law
D&C Solutions, Ireland
Associate Consultant

My name is Dana Law and I'm originally from Los Angeles (don't worry, I don't miss the sunshine). I moved to Berlin to study Philosophy, then to Ireland for my master's in Philosophy and Literature at UCD, then obtained a master's in Interaction Design (UX) at DIT. I started with Version 1's Accelerate program in April 2018 as a UX designer / business analyst and became a software developer in the Oireachtas shortly after. I'm currently a software developer for the Content Management team in Revenue, mainly for the Revenue.ie project. I'm also the health & wellbeing champion and the buzz manager – the V1 karaoke night videos speak for themselves.

Catie Corrigan
Business Support
Associate Consultant

I'm an Associate Consultant on the Business Systems team based in Dublin. My role includes internal support for Atlas and updates, changes, and upkeep of our CRM system. I joined Version 1 in 2018 after completing a Master's in Risk Management from the University of Limerick. I completed my Bachelor's in Mathematics with a Minor in Computer Science at Saint Michael's College in Vermont, USA.

Emer Fogarty
Business Support
Learning & Development Analyst

My name is Emer Fogarty. My curiosity for people and human behaviour led me to study Psychology in NUI Galway which further led me to pursuing a career in People Success. I currently work in the Organisational Learning and Development team and I'm based in Dublin. A lot of my work to date has centred around wellbeing and high performance using psychometric assessments. My interest in high performance stemmed from my passion for GAA as I've played my whole life. Since it has become part of my identity at this stage, I must mention I am the current Kildare Rose and featured in the Rose of Tralee back in August. I love Irish music and a good sing song. When I'm not being stretched in Version 1, I enjoy encouraging others to stretch themselves as I teach yoga as part of my own venture called Rise Yoga. I also love reading all thing's psychology related as well as running, hiking and travel. I'm very excited to be part of the shadow board and I'm looking forward to working with the other board members to collectively see what we can do to positively impact Version 1 going forward.

Luke O'Leary
Business Support
Systems Administrator

Born and raised in Cork, my big size worked always in my favour as a former rugby-pro until I was 21. Apart from rugby, I was always fascinated by computers and knew that I want to be a professional in IT. When I wasn't playing in a match, I would be taking tech equipment apart, curious about the way they work. I finished my degree in Business Information Systems in CIT while learning about the world as security in a bar/nightclub. The moment I got hired in Version 1, I dropped my life in Cork and moved to Dublin. I have been working in the Business and Technology Services and have been enhancing my technical skills and advancing as a Level 2 Systems Administrator. I have been given the opportunity to participate and run projects that are key drivers for my professional development, such as PMP, decommissioning of VMWARE environment and migration to AWS. But most importantly, I am lucky to be in the presence of balance of diversity between personalities, ideas and expertise. My co-workers and I have managed to foster an environment of inclusion and we're always pushing each other to achieve our wellbeing goals as we consider ourselves Engagement Ambassadors.

Kyle Millington-Evans

**Finance
Business Partner**

Based in the Dublin Millennium House office, I am a qualified ACCA accountant and have been the ERP Finance Business Partner since joining Version 1 in December 2018. From the small historic town of Market Drayton in England, I qualified with a 1:1 degree in Mathematics from the University of Chester. In December 2016 I moved to Dublin, Ireland after successfully completing a 3-month financial work placement in Kingston, Jamaica. I am an active sportsman with a strong passion for Arsenal FC (although is deeply considering my poor life decision with the disappointing season, perhaps Aston Villa would have been the better decision after all...)

Daniel Phelan

**D&C Solutions, Ireland
Business Applications Consultant**

I'm Daniel Phelan and I joined Version 1 as part of the Breaking Grads program back in July 2015. You might also know my face from the Supergrads campaign back in 2016! I am originally from Waterford, where I completed my undergraduate in Software Systems Development before moving to Dublin to begin my career with Version 1. I've been part of the Revenue team ever since where I've worked across a number of internal teams before finding my place in the ITS Maintenance and Enhancements team where I am now the Technical Lead on the VAT eCommerce development.

Matthew MacFarlane

**D&C Solutions, Ireland
Managed Services Consultant**

I joined the Version 1 grad program in 2016 and have been working in the Dublin office as a Cloud consultant focusing on AWS and Oracle Cloud. Projects so far for customers such as Irish Life, Wood Group, IAG and Pernod Ricard have involved the design and build of Cloud infrastructure to host the migration of ERP applications. Prior to switching fields to IT, I had a career as an Electronic Engineer in Japan and Ireland, working in heavy industry on gas and steam power plant projects.

Lokesh Shanbhag
ERP
Associate Consultant

Currently I am working in ERP L1 team for ERP ticketing / reporting stuff and also as an Associate Database Administrator in ERP DBA team where I help multiple Irish and UK customers to effectively manage and improve their Oracle systems. I am an IT graduate with Post-Graduation in Data Analytics and currently located in Dublin. Even though my studies look strong on tech side I strongly believe that proper management is a key performance indicator for overall success. I am always eager to learn more and apply knowledge to identify and improve business processes. Apart from job, I love attending events, meetups and summits in my free time and make new connections to know what's going around the world.

Taina Gomes
D&C Solutions, Ireland
Junior Business Analyst

My name is Taina Gomes, I am from Brazil and I have been living in Ireland for almost three years. I began my career working as a C# .Net developer. I joined Version 1 in 2018 as an Administrative resource on a fixed term contract on customer site within a team of circa 30 people. Within 4 months, I was afforded the opportunity to join the BA Team by the customer. Since then, I have been working as a Business Analyst in the area of financial and portfolio management (property). I am driven by my intellectual curiosity to find answers and solutions to complex business questions and problems. On a daily basis I work with key stakeholders & system architects to provide our customer with technology solutions to automate business processes. As I come from a technology background I have a full understanding of the impact of changes.
