

Namrata Jadhav

Business Analyst

“ If you love what you are doing, you will be successful.

What inspired you to pursue the career path that you are on?

One day I came across a post on Hoarding in the early days of my career and I decided to pursue an opportunity in the tech sector.

What does a typical day for you look like?

My day begins with checking emails for any important updates related to our projects. I then prepare a list of tasks to be completed throughout the day. We then have status calls to discuss any issues raised by the Users/Customers. The rest of my day usually consists of working on enhancements in Taleo, ORC and OBIEE Reporting. In my free time, I try to learn new technologies by completing online courses, videos and getting hands-on experience in different areas.

How do you continue to grow professionally?

Since I began working at Version 1, I have been working on multiple projects. As a result, I have learned how to manage my time better. By working on the priorities, I am able to deliver my work on time. All of this experience is helping me to grow professionally.

Tell us about an accomplishment you are proud of?

At the start of my journey at Version 1, I was given a reporting job which was my first ever task like this. It later turned out to be successful and was much appreciated by the Customer. Soon after, I started seeking out challenges by working in different areas, this has helped me to challenge and motivate myself.

What advice do you have for other women interested in joining your field/team?

For me, it depends on the individual interests of every person and where they want to build expertise. They should have a good technical, functional understanding of Recruitment, Onboarding, Learning Modules, problem-solving skills and always be a learner.

What woman that has made a positive impact on your career?

My guardian angel, motivator, and best friend; my Mother. She always kept me motivated and has made a positive impact on my career and my life.

How do you define success?

Success is doing what makes you happy. If you love what you are doing, you will be successful.
