

VERSION 1

Simplified Stories

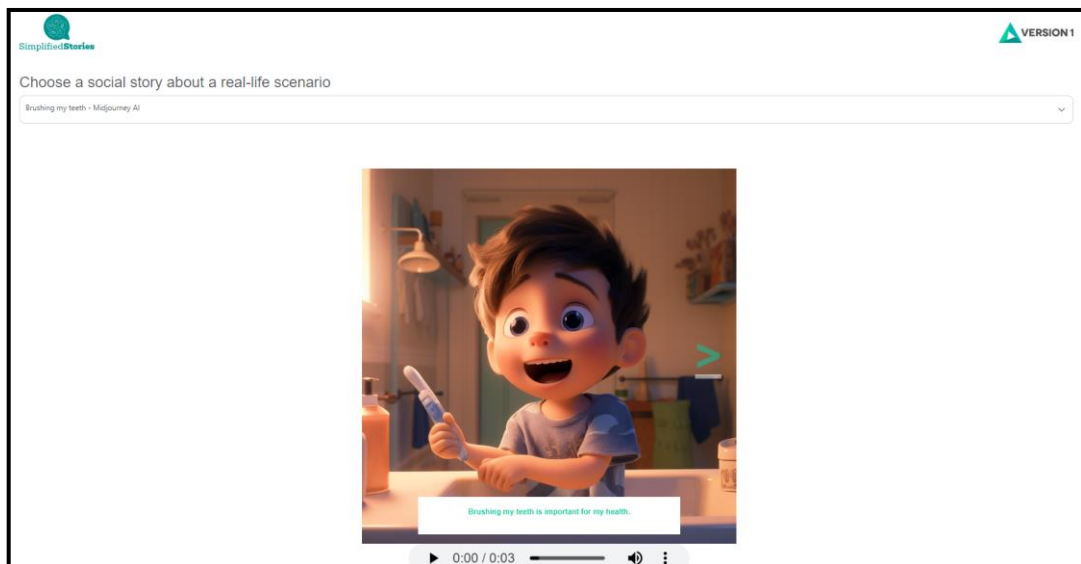

Improve social interactions for neurodivergent individuals by providing easy-to-understand stories along with animated visuals and audio guidance.

How does our innovative solution address the challenges faced by people with intellectual disabilities in navigating social situations more confidently? How does the combination of simplified social stories with animated images provide guidance for social interactions?

60% of people living with an intellectual disability encounter difficulties in communication, leading to impairments in various aspects of social interaction. These challenges can limit their ability to comprehend and participate effectively in social situations.

Communication, as a fundamental part of independence, can become challenging for these individuals. To address this, our platform offers a unique and innovative approach.

SIMPLIFIED STORIES helps in breaking down complex social situations into easily understandable narratives. Each story is thoughtfully narrated for diverse social contexts. Through the integration of advanced Generative multi-modal AI, our platform generates captivating images and audio to complement the stories.

This application is designed with a focus on neurodiverse individuals, enabling them to learn how to behave effectively in social settings with more confidence.

Personalised stories act as valuable guides, providing crucial guidance on appropriate behaviours in various social scenarios.

With **SIMPLIFIED STORIES**, we strive to promote inclusivity, and empower individuals with intellectual disabilities, equipping them with the insights and knowledge they need to navigate the complexities of social interactions. Ultimately, empowering them to engage more effectively with their surroundings.

Features

Easy to use

Covers diverse social situations

Powered by advanced GPT AI technology

Multi-sensory experience with text, images and audio

Highlights
