

VERSION 1

# Simplified Text

Enhance the understanding of complex information for individuals with intellectual disabilities by converting complex text into easily understandable formats, along with audio support and language translation services.

How does our innovative solution help neurodivergent individuals accelerate their comprehension of complex information?

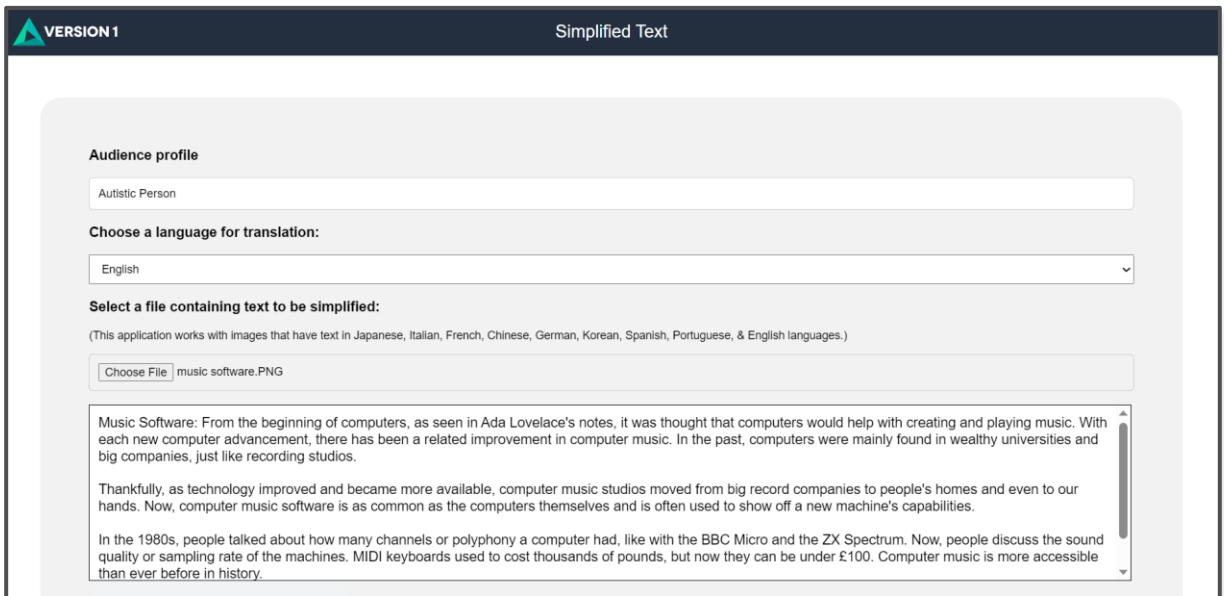

Individuals who have unique ways of thinking and processing information can sometimes encounter challenges when trying to understand complex ideas or information. This can make learning, studying, and even everyday activities more challenging.

To address this issue, our **SIMPLIFIED TEXT** application offers a unique solution.

The screenshot shows the 'Simplified Text' web application interface. At the top left is the 'VERSION 1' logo. The title 'Simplified Text' is centered at the top. Below the title is a form with the following sections:

- Audience profile**: A text input field with the placeholder text 'Describe your target audience here.'
- Select file(s) containing text to be simplified:**: A section with a note '(This application works with Japanese, Italian, French, Chinese, German, Korean, Spanish, Portuguese, & English languages.)' and a file selection area showing 'Choose Files' and 'No file chosen'.
- Generate QR codes**: A dark blue button at the bottom of the form.

**SIMPLIFIED TEXT** is available as both web and mobile apps, powered by advanced Generative AI technology. Both applications allow users to specify the target audience, such as a neurodiverse person or young children.

When users provide an audience profile and document, our app simplifies the text, making it easier to understand.

In the web app, scanning the code lets users access the simplified text. The mobile app also provides text, with the addition of audio, making it a comprehensive and accessible learning experience. Additionally, users can even pick their preferred language from a menu to receive the simplified text in their chosen language.

This complete package provides a versatile and inclusive platform for enhancing the understanding of complex information.

Our application is like having a friendly guide, who makes the journey through complex information less daunting and more enjoyable.

**SIMPLIFIED TEXT** has broader use cases and can be used to highly personalise experiences such as providing enhanced customer experience for different demographics or to aid in accessibility in chatbots and digital channels.

## Features

Easy to use and caters to a wide range of audiences

Powered by advanced Generative AI multi-modal technology

Accepts Image, CSV, PDF, and text documents. Provides Audio output

Multiple language support

## Highlights

Offers a user-friendly interface, audio assistance and language translation support.

Enhances learning experience for individuals with intellectual disabilities by converting complex text information into easily understandable formats.

Addresses challenges neurodiverse individuals face in grasping complex content.
