

Amazon FinSpace Accelerator

Deploy in minutes, reduce TCO forever.

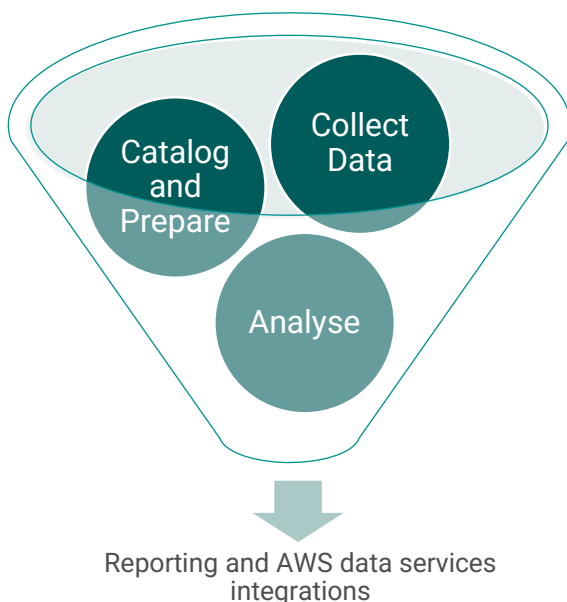

Advance your data insights and reduce TCO at the same time with the **Version 1 Amazon FinSpace accelerator**.

Version 1 are uniquely positioned to help your organisation deploy, manage and evolve KDB+ in AWS.

The Capital Markets team at Version 1 has SMEs who possess deep expertise in KDB+ and industry-specific use cases, while the AWS team has extensive knowledge of AWS services, including AWS FinSpace and will help evolve the service with integrations to the wider AWS toolset and other AWS hosted data analytics providers like Snowflake and DataBricks.

- Deploying KDB+ in AWS will **reduce TCO and improve business agility** with deployment in minutes and elastic scaling to fit demand.
- Amazon **FinSpace makes available the full KX product suite** without the large Capex usually required to invest in such technology.
- The Version 1 **Amazon FinSpace Accelerator** would be used as part of a consultancy engagement that will endeavor to elicit further integration and environmental requirements.

The accelerator provides all the KX service functionality plus integration with KX Developer and KX Dashboards, with automatic connection management.

Key benefits:

- Reduce TCO for KDB+ Insights
- Improve business the value of your data with deployment in minutes and elastic scaling to fit demand
- Built by Version 1 AWS and Capital Markets experts to help you on the journey to cloud and data driven value
- Integrate to the rich portfolio of AWS products with seamless integration to AWS data services.
- Support an accelerated migration to cloud
- Built-in operational monitoring via CloudWatch
