

Migrate and modernise Oracle workloads to Azure

Ensure a secure, cost-efficient, and future-ready cloud transformation

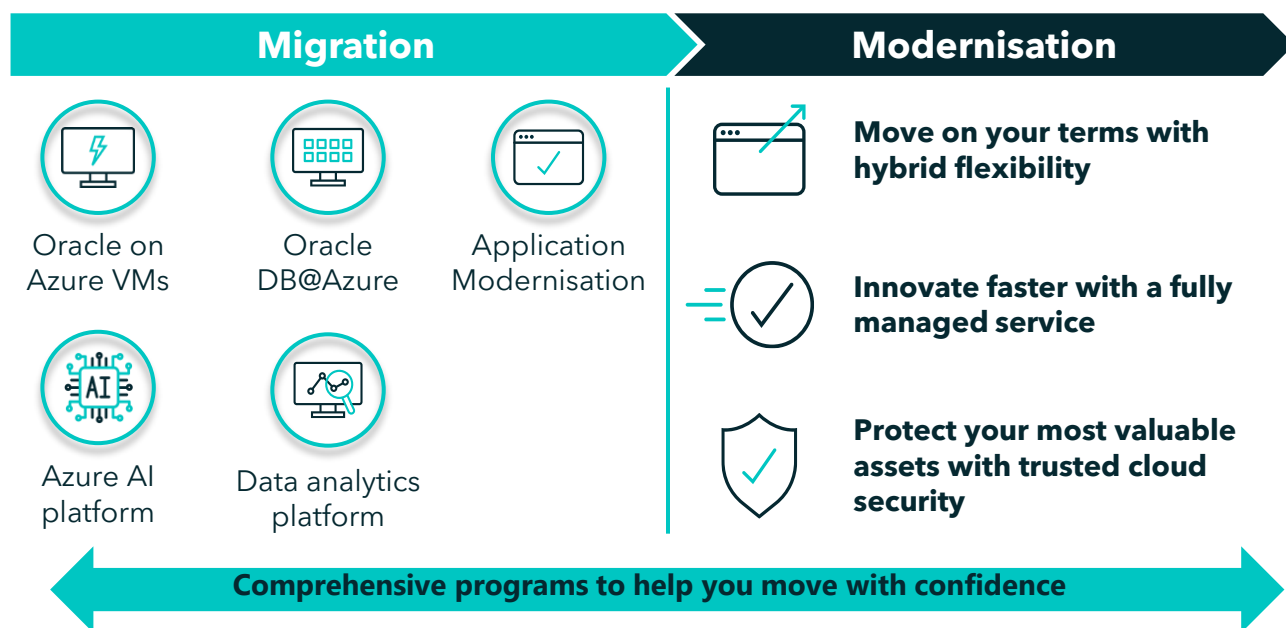

Transform Oracle workloads with cloud

Organisations are choosing to move Oracle workloads to the public cloud as they face rising expenses, complicated licensing and the challenge of managing outdated infrastructure. Traditional on-premises setups often fall short on agility, scalability and resilience, making it hard to drive innovation or keep pace with changing compliance and security needs.

Microsoft Azure overcomes these obstacles by providing flexible pricing, worldwide reach, integrated security and compliance, and effortless connectivity to fully managed Oracle cloud solutions.

Why migrate and modernise Oracle workloads to Azure

Migrating Oracle workloads to Microsoft Azure is more than just a lift-and-shift – it's a strategic modernisation opportunity. Working with us, you can benefit from a trusted partner with deep Oracle and Microsoft expertise and repeatable accelerators, ensuring a secure, cost-efficient, and future-ready cloud transformation.

Innovate faster by modernising applications and data:

Modernise applications and workloads, integrate and innovate with services such as [Azure AI](#) to meet evolving business needs efficiently

Protect valuable assets with trusted cloud security:

Benefit from AI-powered, expert-backed security that proactively protects assets against evolving cyber threats

Leverage the power of Microsoft Fabric:

Unlock data insights and innovation using Azure data analytics and AI services across your Oracle workloads

Pay less, use best-in-class infrastructure:

Move to resilient cloud infrastructure for future-proof productivity and on-demand scale with an optimised license model

Move on your terms with hybrid flexibility:

Azure hybrid solutions let you manage assets consistently across cloud and on-premises environments, your way

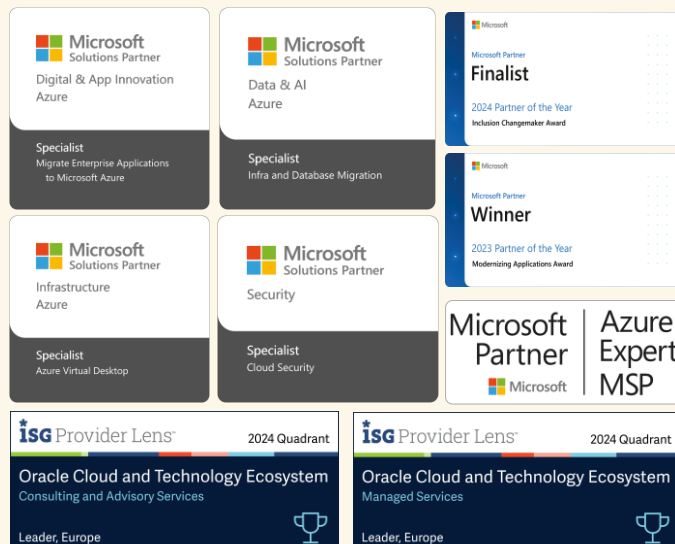

Oracle Database@Azure

Run mission-critical and real application clusters (RAC) workloads with Exadata Database Service

Why Version 1

We are a leading Microsoft Azure and Oracle consulting partner with 30 years of expertise. We are recognised for our extensive certifications and global experience in modernising Oracle applications and databases to Microsoft Azure. Our specialist teams support every stage of migration, from building the business case through to ongoing management and optimisation, leveraging proven tools and repeatable processes to accelerate and de-risk Oracle to Azure migrations for seamless transitions.

We have earned numerous accolades, including Oracle UK OUG awards and the prestigious Microsoft Azure Expert MSP accreditation, underlining our excellence and commitment in delivering Oracle and Microsoft cloud solutions over the years.

Partner of the year awards 2025

- **Gold UKOUG:** Database | Platform | Managed Service - Technology | ERP Fusion Cloud
- **Silver UKOUG:** Data Integration | Analytics
- **Bronze UKOUG:** Managed Services - Applications | Applications Unlimited | HCM Fusion Cloud | GenAI & Innovation
- **Best Application Project of the Year Award**
- **Innovation Partner of the Year 2023** Oracle EMEA Partner Award

Standardised, repeatable accelerators

Oracle on Azure landing Zone accelerator

- CAF-aligned modular approach optimised for Oracle workloads
- Automation routines for standardisation and efficiency

App modernisation accelerators

- Automated standards for environment creation
- Best-practice DevOps pipelines and methods
- Strong focus on security best practices

Oracle Exadata accelerator

- Optimise based on ExaChk and our best practice
- Exadata patching runbooks
- Bespoke hardware and software check

TCO calculator

Our Oracle TCO calculator will indicate the achievable cost savings for your business by migrating Oracle workloads to Azure.

Migration methodology

We have a tried and proven cloud migration methodology built from industry best practices and our expertise in Oracle technologies.

License and Oracle expertise

We have a dedicated software asset management practice with 20+ years of Oracle expertise and over 300 Oracle consultants.

Integration specialists

Application, database, infrastructure and systems integration specialists. We have expertise across the full stack.

ASPIRE managed services

We provide a next-generation cloud managed service that focuses on continual optimisation of your estate.

ORACLE®

29+

years of Oracle expertise, certified Oracle Modern OPN partner and Cloud Solutions Provider. One of Europe's most distinguished Oracle Cloud partners.

700+

consultants and professionals delivering solutions and services to 300+ customers.

570+

Oracle certified professionals with specialisation delivery across the entire stack.

 **Microsoft**

18+

Recognised Azure Expert MSP. We deliver award-winning, end-to-end Microsoft cloud solutions across UK and Ireland since 2006.

600+

cloud specialists across devops engineers, platform engineering, architects, delivery management, cloud advisors and migration specialists.

130+

Microsoft certified professionals.
