

Oracle E-Business Suite (EBS)

Transforming your Oracle E-Business Suite for maximum performance and business alignment.

We are experts in managing E-Business Suite implementations, upgrades and managed services for enterprise organisations across a broad range of sectors. We are responsible for some of the largest European implementations of E-Business Suite, recognised with 10 awards at the annual UK Oracle User Group (UK OUG) Community Awards 2025.

Unrivalled expertise and experience in Oracle EBS services

Implementation

We combine Oracle ERP expertise with industry knowledge, utilising a best practice for implementations across various industries, maximizing value add and speeding deployment.

Upgrade services

We assist Oracle EBS customers in upgrading to Oracle E-Business Suite R12, ensuring they understand the opportunities and benefits of adopting standardised processes.

Automate and digitise

Oracle E-Business Suite offers a suite of add-ons to automate and digitise core ERP platforms, reducing costs, improving usability, and driving productivity.

Software Asset Management (SAM)

Our SAM team assists E-Business Suite customers in identifying compliance risks, optimising licenses, and comprehending contractual terms and conditions.

Managed services

We offer support for E-Business Suite, covering functional and technical expertise, and more, either as a remote service or a customised support model.

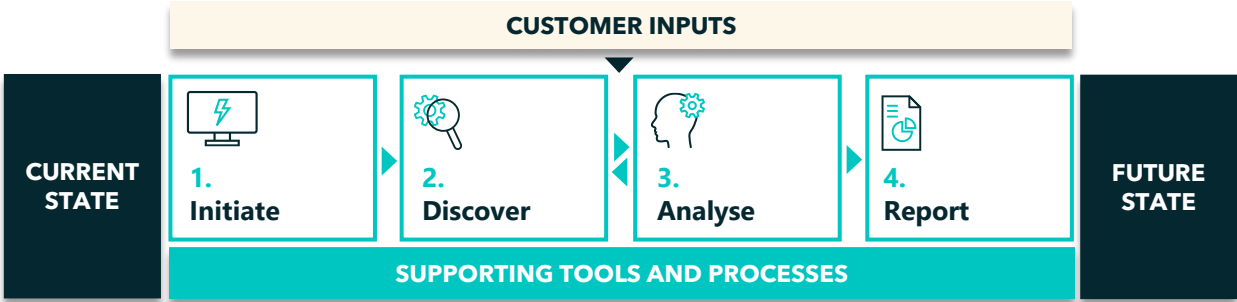

Consulting

We assist customers in optimising their E-Business Suite investments, offering unique services like the Roadmap Discovery process and specialist Architecture Reviews.

Empowering businesses to make informed decisions for sustained success with integrated AI.

We employ a structured approach to optimisation

By partnering with us, customers can expect

Cost reduction

Significant reduction in support and maintenance costs through efficient management and optimisation of EBS environments.

Improved efficiency

Enhanced operational efficiency through streamlined processes and effective integration of systems.

Business alignment

Aligning IT with business goals to drive down costs and support organisational objectives.

Expertise and innovation

Access to our extensive expertise and innovative solutions, ensuring that customers stay ahead in a rapidly changing IT landscape.

Increased availability

Ensuring that critical applications are always available and performing optimally to meet business needs.
