VERSION 1

Top 6 barriers to AI success

1. **Uncertain Use Case Value**
2. **Technical Transition to Production**
3. **Cost and Value Unpredictability**
4. **Risk and Privacy Management**
5. **Regulatory Compliance**
6. **Data Quality and Availability**

Our approach to overcoming barriers

Proven Use Cases: Co-create and validate key Oracle use cases swiftly.

Production Expertise: Extensive portfolio of production-ready solutions, accelerators and landing zones for Oracle.

Cost Optimisation: Best-fit models and continuous cost optimisation with ModelOps.

Risk Management: Proficiency in Open and Closed source AI, including SLMs for secure implementations.

Regulatory Expertise: Lead in Responsible AI compliance and policy guidance.

Data Excellence: Advanced integration, cleansing, and AI tagging solutions.

VERSION 1

Building AI powered solutions using Oracle's native AI services

A solution service for Oracle customers, to educate and explore AI technologies and solutions, and to help establish them as leaders in business innovation and value through AI.

AI-powered business growth

We use our AI expertise alongside Oracle's embedded AI to elevate business processes for stronger results and growth.

Maximising Oracle's AI potential

We unlock the full potential of Oracle's AI-embedded solutions, ensuring customers harness the power of AI for operational excellence and competitive advantage.

Version 1's Oracle AI Labs

- Large Language Models
- Natural Language Processing
- Small Language Models
- Accessibility, Transparency and Accountability
- Classification, Clustering and Forecasting
- Image Recognition, Classification and Segmentation
- Recommendation Systems and Link Prediction
- AI Transformation
- Cloud FinOps and GreenOps
- Next Gen Dev

VERSION 1

Unlock Oracle modernisation and support challenges using our custom Gen-AI tool

Read Oracle Code Base

Interpret codebases for enhanced readability without manual effort

Extract segments

Analyse files in a repository to extract specific code segments

AI Translation

Leverage latest AI models to translate codebases into relevant documentation for support

Generate Documentation

Automate the process of creating technical and business documentation

Query Insights

Analyse codebases, providing tailored responses and visual data

Languages currently supported:

ORACLE PLSQL · Java · COBOL · C#

Decipher

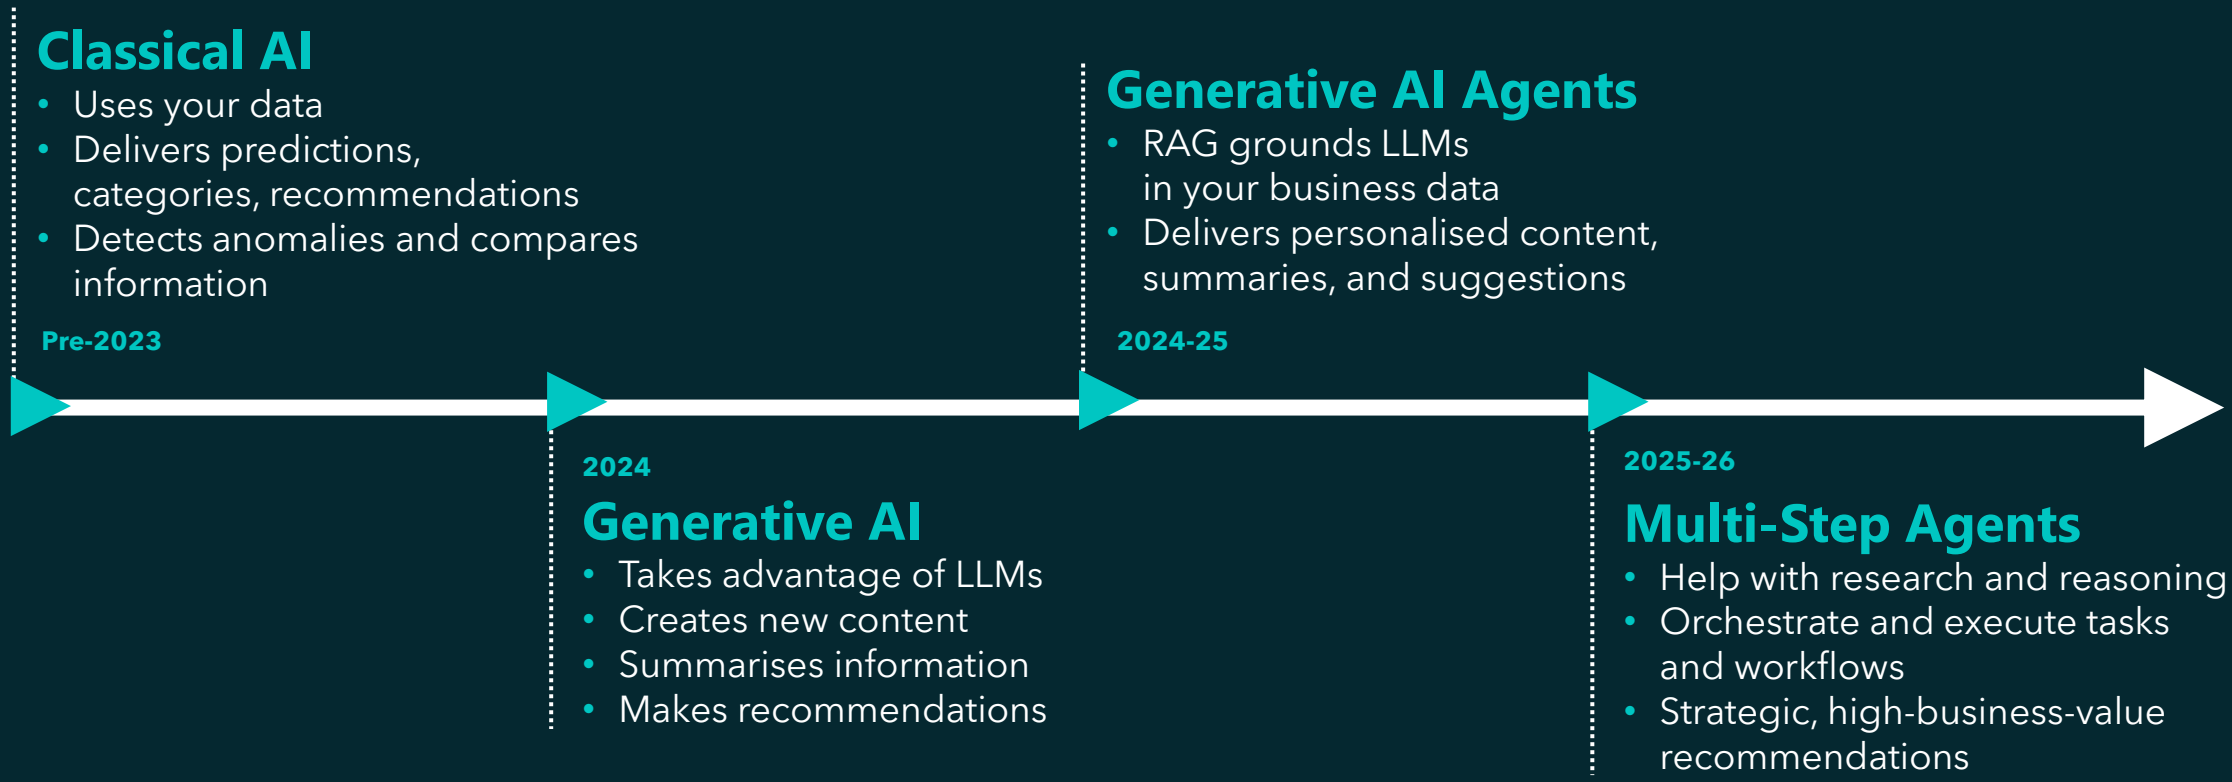

AI powered code analysis and documentation

Our Cloud agnostic AI solution that automates the generation of functional and technical documentation to decode Oracle codebases and enable efficient, cost-effective application modernisation and support.

VERSION 1

Oracle AI (Proof of Value) Offering

Scope of activity

- **Day 1 – Co-Creation Lab Session:** Align business and IT on priority workflows and problems.
- Build a working prototype using your data and secure enterprise architecture.
- Test feasibility, integration and commercial viability with your team.
- Demonstrate the prototype and agree a transition plan for production.

Benefits

- Move from problem definition to a working prototype in 5 days.
- Validate feasibility and ROI before investing in full delivery.
- Work directly with senior specialists and architects.
- Use a methodology with a 62% PoV-to-production conversion rate.
- Align business and IT early to reduce rework and support adoption.

Delivery & Duration

- Duration: **5-days**, with 1 day of co-creation and 4 days of build and demonstration.
- Combine interactive strategy sessions with hands-on development in hybrid sprints.
- Senior architects and domain specialists work alongside your team.
- Day 1: scope. Days 2–4: build and integrate. Day 5: demo and transition plan.
