- Cloud Application Project – Softcat
- Cloud Application Project – NCP

Analytics

VERSION 1

ANALYTICS: Oracle Analytics Healthcheck Assessment

Version 1's Oracle Analytics Healthcheck is designed to maximise the return you get from your Oracle Analytics Investment.

We will assess your system across four key dimensions and provide actionable advice to allow you to improve the value you get from your data.

Data

- Data Sources
- Data Breadth
- Data Delivery and Quality
- Data Governance

Users

- User Skills
- User Sentiment
- User Pain Points

Impact

- Analytics Usage Trends
- User Adoption
- Business Coverage
- Business Impact

Technology

- Data and Analytics Maturity Level
- Technical Debt
- License Subscriptions Use and Coverage

Assessments can be tailored to ensure you get exactly the right insight to allow you the confidence to build an Analytics roadmap that will continue to drive costs down and value up. Such case studies usually identify both quick wins, more strategic options, and potential risks currently with the solution, or on the horizon.

Pricing: fixed price engagement at reduced rates

Benefits

- Fast Review of Analytics Position
- Create Roadmap Improve Planning
- Identify Innovation Opportunities
- Reduce Risk
- Reduce TCO

WHY ORACLE ANALYTICS?

Data Visualisation

Highly effective and dynamic visualisations help users to learn the key and most important insights

Data Management

Provide business users and analysts the freedom of working with any data in a self-service mode.

Machine Learning

Tools to generate their own machine learning models using a variety of supervised and unsupervised machine learning algorithms from Oracle Analytics.

Maximise your Investment

Many businesses have invested considerably in their enterprise analytics & reporting on-premises Oracle Business Intelligence solutions.

These frequently complex environments have supported the business well, but they have also started to hinder the ability to adopt innovations, reduce costs and seize new opportunities.

By moving Oracle Business Intelligence to Oracle Analytics, your organisation will gain all of the new features of a modern, augmented business analytics platform while preserving years of investments.

Whether you want to migrate to the cloud or upgrade on-premises, the path is basically, the same, and Version 1 can help.

ANALYTICS: Advanced Analytics

Many customers continue to enjoy the benefits of ERP Software. Version 1 has built a packaged accelerator to allow these customers to add Advanced Analytics using OAC and Autonomous Data Warehouse in an efficient and accelerated way.

The Version 1 Advanced Analytics Accelerator is a pre-built Warehouse, and Integration Data Pipelines that accelerates the deployment of Advanced Analytics and reduces the cost. Included are KPIs and aggregate tables, that mean gaining insight and creating business-specific reports is easy.

Integration Layer

ODI on Oracle Cloud with pre-built integration components and data pipelines

- Prebuilt data pipelines
- Change data capture
- Data transformation
- Performance accelerators

Data Layer

Autonomous Data Warehouse, with prebuilt, zoned Data warehouse

- Prebuilt 3-Zone Data Warehouse
- Performance accelerators
- Data change tracking

Analytics Layer

Oracle Analytics Cloud, with prebuilt logical layer with KPIs

- World class Analytics capability with Visualiser, Dashboards, Publisher Reporting and AI Capability

Benefits

- Rapid Path to Advanced Analytics
- Gain New Insights
- Intelligent Data Search
- AI Enabled and Accelerating
- Full Enterprise Reporting Solution

WHY ORACLE ANALYTICS?

Data Visualisation
Highly effective and dynamic visualisations help users to learn the key and most important insights

Data Management
Provide business users and analysts the freedom of working with any data in a self-service mode.

Machine Learning
Tools to generate their own machine learning models using a variety of supervised and unsupervised machine learning algorithms from Oracle Analytics.

Unlike other Packaged Analytics Products, the Version 1 Advanced Analytics Solution does not try and force your business to try and fit the Analytics, but makes it faster to get Analytics that fits your business.

We can offer a range of deployment options, including Fixed Price Deployment, and there are no ongoing charges – the solution is entirely your own.

The solution is a risk-free pathway to Oracle's best Analytics technology and AI.

Analytics Offering

Scope of activity

- Assess data, users, business impact and technology across your Oracle Analytics estate.
- Identify quick wins, strategic improvements and risks.
- Deploy pre-built data pipelines and an Autonomous Data Warehouse.
- Oracle Analytics Cloud with pre-built KPIs and reports tailored to your business.

Benefits

- Identify ways to reduce total cost of ownership and improve analytics adoption.
- Accelerate analytics with pre-built warehouse and integration components.
- Support enterprise reporting, intelligent data search and AI-enabled analysis.
- Improve planning and identify innovation opportunities and risks.

Delivery & Duration

- Tailored, fixed-price assessment at reduced rates, with actionable advice.
- Flexible delivery options, including fixed-price deployment.
- A customer-owned analytics solution tailored to business needs.
- **Duration:** Initial **3-days**, then agree assessment or deployment timelines based on specific scope and requirements.
