Boost your cloud

2026

Classification: Controlled. Copyright © 2026 Version 1. All rights reserved.

Version 1 has one of the most extensive and capable Global Oracle Practices with a full range of Advisory, Development and Managed Services capabilities.

Global AI adoption and engineering capability

500+
Discovery & AI transformation specialists

140+
Certified Anthropic Engineers + FDEs

50+
Certified Oracle Agentic AI certifications

80+
Business change and adoption specialists

4,250+ people **c. €485M revenue**

30 years' experience **176 AI customers**

13 global locations for follow the sun support

AI Industry best practice

Global lead two years running

Change & Adoption Leader

ISO 42001 Certified
Verified responsible, transparent and well-governed AI practices

62% **PoCs to production rate**
Twice the industry average

Oracle Partner for 30+ years - 700+ dedicated Oracle consultants delivering solutions and services to 300+ customers

2026 Oracle Partner Awards Winner

EMEA Fusion Breakthrough - Winner
EMEA ERP Breakthrough, HCM Breakthrough, Success Navigator Partner - Finalists

Recognised experts in Oracle applications

ORACLE | Service Partner
Expertise in Oracle ERP Financials Cloud in EMEA–UKIE

Oracle Apps to OCI

Classification: Controlled. Copyright © 2026 Version 1. All rights reserved.

VERSION 1

Oracle Applications Unlimited migration to OCI

E-Business Suite (EBS), JD Edwards (JDE) and PeopleSoft on Oracle Cloud Infrastructure

MIGRATION APPROACH

Assess

Versions, customisations and dependencies

Design

OCI architecture, security and recovery

Migrate and test

Trial migrations, validation and cutover

Operate

Monitoring, patching and cost control

Application-specific migration

E-Business Suite

Assess EBS Cloud Manager for eligible Linux environments or use a supported manual migration route.

JD Edwards EnterpriseOne

Assess One-Click Provisioning for deployment and migration, including custom objects and integrations.

PeopleSoft

Assess PeopleSoft Cloud Manager for eligible environments, including PeopleTools and customisations.

Readiness and delivery checks

Confirm application, tools, database and OS certifications, support status and licence entitlements.

Size production and non-production tiers. Map interfaces, batch workloads and peak demand.

Design OCI networking, identity, backup and disaster recovery against agreed RTO/RPO targets.

Rehearse data migration, performance testing and business acceptance. Agree cutover, rollback and support.

Migration method and any prerequisite upgrades depend on the current estate and Oracle certification.

Classification: Controlled. Copyright ©2026 Version 1. All rights reserved.

VERSION 1

Applications Unlimited OCI migration with Version 1

A planned migration of EBS, JDE or PeopleSoft focused on business priorities, backed by testing and change management

THE VALUE OF OCI

Performance and cost

High-performance computing and cost efficiency

Security and availability

Comprehensive security and global reach

Scale and innovation

Flexible capacity, data management and new services

Migration control

Defined scope, repeated testing and documented delivery

A delivery approach built around your estate

- ❑ Define application scope and testing requirements around your business priorities.
- ❑ Rehearse integration, disaster recovery and cutover through multiple test cycles.
- ❑ Plan changes to interfaces, connectivity and firewall rules. Document delivery and augment your EBS team where needed.

Customer references

NHS Barts Health NHS Trust

angel Trains

Ongoing support

Cloud operations, service management, cost control and next-generation services.

Next step: agree the migration scope and assessment with your application and infrastructure teams.

VERSION 1

Oracle Apps to OCI Offering

Scope of activity

- Assess EBS, JDE or PeopleSoft versions, customisations and interfaces.
- Design OCI capacity, security, backup and disaster recovery.
- Migrate and test applications and data. Rehearse cutover and rollback.
- Post-cutover hypercare to monitor performance and support a smooth transition to business-as-usual operations.

Benefits

- Improve performance and cost efficiency.
- Strengthen security and availability, with capacity that scales.
- Reduce migration risk through repeated testing and documented delivery.
- Support ongoing operations and cost control.

Delivery & Duration

- We work with your application and infrastructure teams.
- Assess, design, migrate and test, then cut over and transition to support.
- Duration: Confirmed after initial **5-day** assessment, based on estate complexity, upgrades and test cycles.
